

The ORU Ready is a great approach for when you need your plant to be mobile. This decumulative plant can produce up to 160 cubic yards per hour, and is easy to setup and move to the next project.

The plant is galvanized to be long lasting with less maintenance. Add a divider into your bin to load with 3 separate aggregates. Add bin extensions to give you more versatility. Build a ramp to load directly from your loader.

The Ready is a workhorse and is ready to be on your next site. Choose a basic software or the HPS 2100V for even more versatility.

TECHNICAL SPECIFICATIONS

		ORUREADY 160
Hourly production	yd ³	160
Galvanized Bins (w/divider)	#	2(3)
Rear Hopper Capacity	yd ³	11
Front Hopper Capacity	yd ³	10
Total Height w Wall Extensions	ft	10' 6"
Cement Weighing Hopper Capacity	yd ³	3.7
4X traction weighing cells for hopper - cap.	lbs	6,615
Screw Feeder Diameter	in	12.7
Power	hp	12
Belt Length	ft	34
Belt Width	in	30
Power	hp	20
